

Steps to Install Basic TTRE DLL

TTRE Basic Chart Template

September 11, 2011

Installing the DLL

You received:

1. The [Basic TTRE DLL Installation Instructions, Sep 11, 2011](#) pdf
2. The [TTRE.DLL](#). The DLL contains the basic studies that are free with your TTRE Live Trading Room Subscription. TTRE uses your Infinity or Sierra chart login username for authorizations. You will have use of this DLL as long as you are a current member.
3. [TTRE Infinity-Sierra Charts Global Settings 11Sep2011](#) pdf
4. A [Chartbook Template](#) with example charts. SAVE this Template and DO NOT CHANGE.
5. After copying the chartbook to Sierra, Open this chartbook and then change name by using Save As with a different name.
6. It's important to follow the instructions as close as possible.

Steps to Install the TTRE DLL

To set up a chart you will first have to copy the DLL provided to the appropriate data directory of your charting package.

For non-Infinity Chart, Sierra subscribers use:

C:\SierraChart\Data.

For Infinity Charts:

c:\SierraChart\SierraChartTransActMA\data

1. Close down you charting package
2. Open the ZIP file (if zipped)
3. Select the TTRE.DLL file and either copy or drag it the you data folder of your charting package, examples:
 - c:\sierrachart\data
 - c:\SierraChart\SierraChartTransActMA\data
4. Select the chartbook and copy to the same data folder:

Setting Up Your Charts

1. Go to File Open Chartbook,
2. Find, select and open chartbook called **_TTRE DLL Basic Chart Template...**
3. File => Save As change chartbook name you want to use daily

Template Chartbook Description, includes:

1. Indexes: ES, YM
2. Currencies: 6a, 6e
3. Two 5 min charts with Pit and 24 hour sessions respectively
4. 5 min Pit Session uses 24 hour session analysis for smoother gap transition
5. TTRE EMA identifies cycle direction on that timeframe
6. 5 min: TTF – TradableTimeFrame
 - (1) Congestion Pattern -Red/Blue Dot Markers enabled (Settings – Hide -Yes/No)
 - (2) ActionLine (AC) – TTRE EMA of 5min 24hrs Session
 - (3) TradableCycle (TC) – TTRE EMA of 30min 24hrs Session, Overlay
 - (4) DominantCycle (DC) – TTRE EMA of 240 min 24 hrs Session, Overlay
 - (5) AverageRange 7 periods (AvRng7)
 - (6) OutsideBars (OB) – Orange
 - (7) NarrowRangeBar 7 periods (NR7) - Cyan
7. 30 min Chart, NTF – NextTimeFrame, NTF and HTF TTRE EMA, Overlay
8. 240 min Chart, HTF - HighestTimeFrame
9. Indexes: ES, YM 2 min Chart
 - (1) (2) TTRE EMA 2min,with 5min and 30 min Overlay
 - (2) NYSE \$TICK
 - (3) \$ADVDECL with TTRE EMA
 - (4) AvRng7

You can use the Save As to create various chartbooks to include various combinations of markets.

All chart symbols are Linked. Notice the L:# on the top color frame of the chart. That is the Link Number (NOT Chart Number). Charts that have the same link number are linked together by symbol.

See Chart => Chart settings => Advanced Settings 2 tab, “Chart Linking”

Once in the custom studies area you be presented with a list of study libraries currently available. If you have correctly copied the DLL there should be a listing for the TTRE studies

To expand the TTRE click on the "+" sign to get a list of studies

From the expanded list select "Congestion, ExponentialMovingAverage" and pressing the "ADD" button for each. This will return you to the studies window. It will be necessary to customize the setting since we're not able to create the default setting correctly programmatically. This may change at a later date but for now we'll do it the hard way.

Once complete press the "OK" button to return to the Chart studies window. You can press the OK button to exit the screen and see the result. Generally just follow the above instructions to add it in and leave the defaults. More information can be found at

Don't forget to save you chartbook
from the menu File --> Save as.... Name it as you wish
